

Hiring a Naturopathic Doctor for Your Clinic Provides Many Benefits

Currently, Americans receive only half of the nationally recommended preventive services. Though the ACA addresses this, without the trained PCP workforce, challenges will remain. Only 34% of active physicians reported practicing primary care medicine. With the increasing demand and decreasing supply, it's leaving millions of patients without care mandated by the ACA, an opportunity for qualified Naturopathic Doctors can fill.

Patient Centered

Committed to serving the underserved. Meet patient demand and cultural preferences for integrative health and medicine options.

Comprehensive

Trained to order lab tests, images, procedures and other diagnostic tests.

Manage acute and chronic conditions.

Collaborative

Highly trained in team-based care.

Deliver first contact continuous and comprehensive primary care health services.

Integrative

Focus on prevention and health promotion diagnosis and treatment.

Trained to prescribe and manage conventional prescriptive medications and also non-drug therapies.
